The diagram shows the construction of a 19-bit binary sequence from 19 input bits. The inputs are arranged in a grid with 5 rows and 4 columns. The first 18 inputs are grouped into pairs, and the 19th input is a single bit. The outputs are arranged in a grid with 5 rows and 4 columns. The first 18 outputs are grouped into pairs, and the 19th output is a single bit. The diagram illustrates the construction of a binary sequence from a set of inputs.
