

OCD Version #1

serial# 000-4563

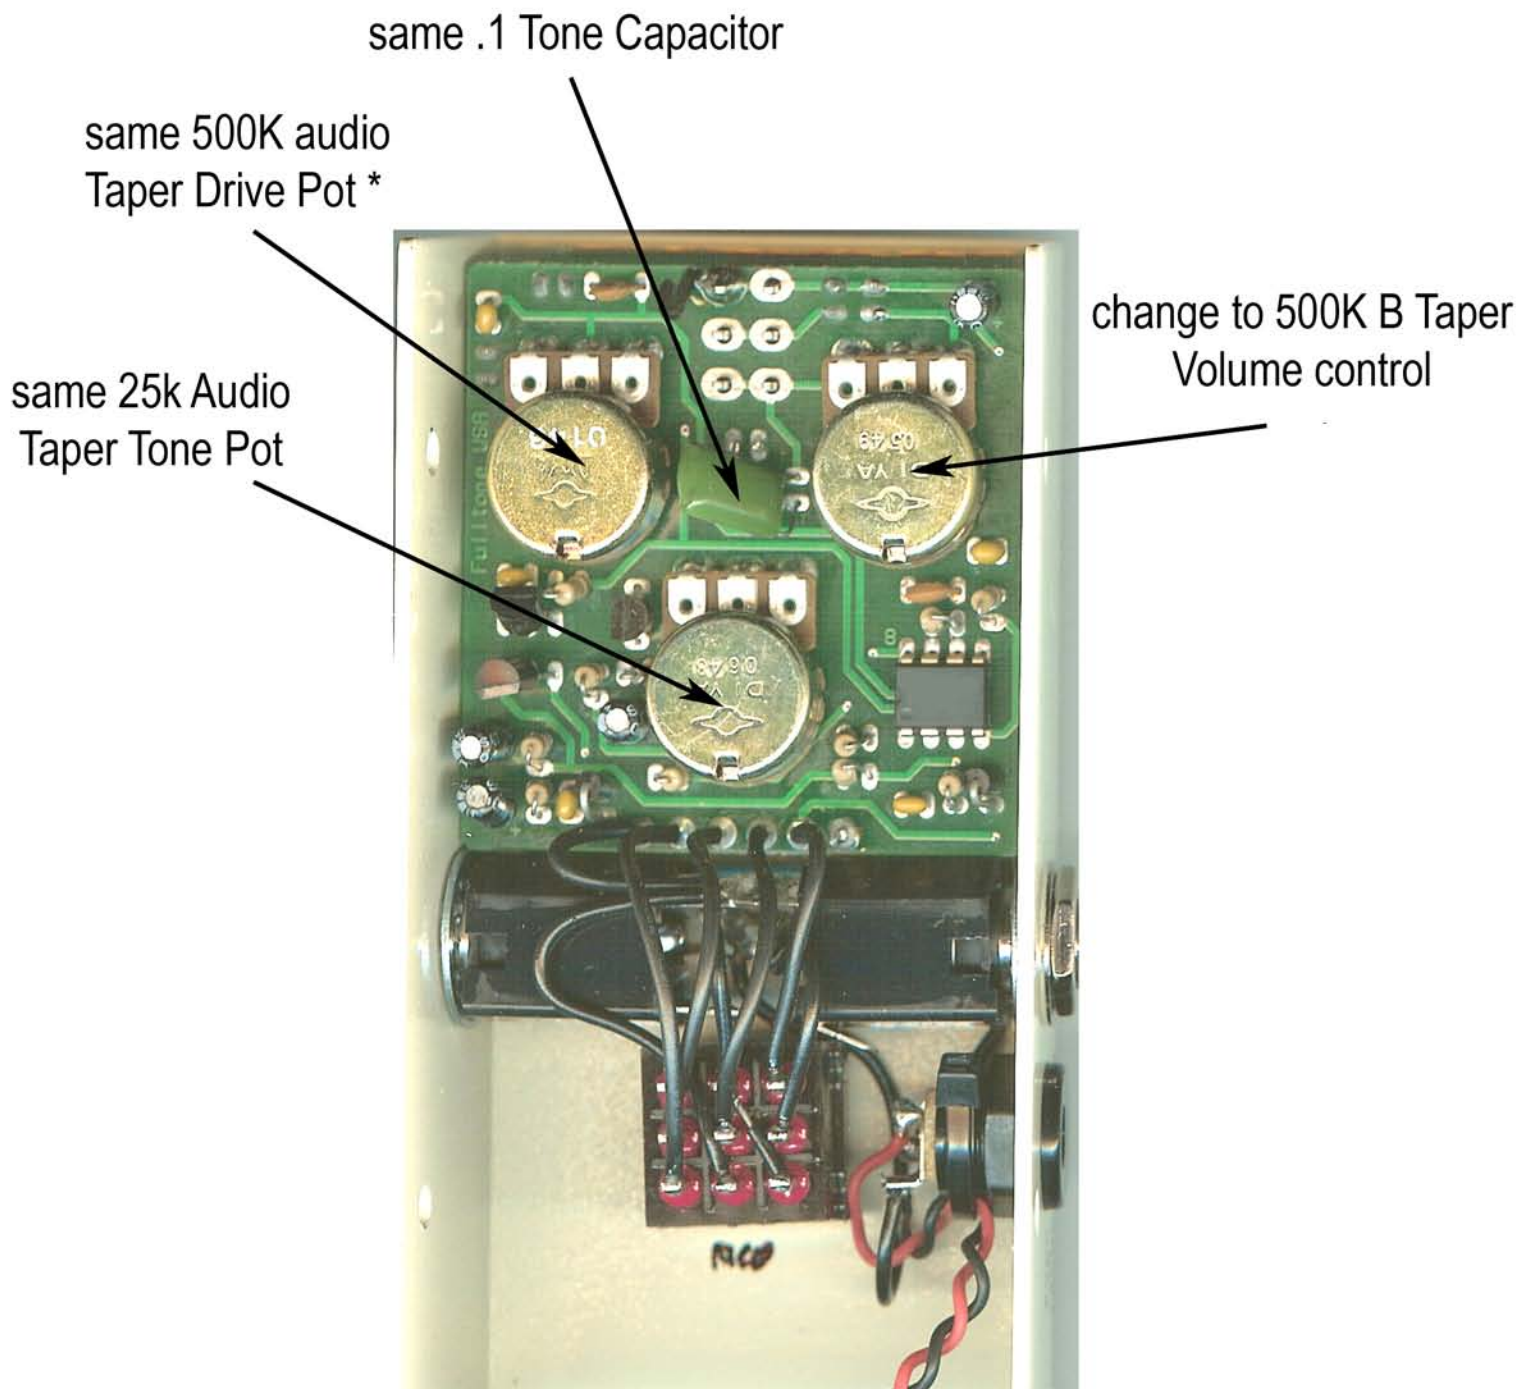

Due to large amounts of epoxy covering the PCB,
mods are difficult or impossible to do on Version 1 OCD's.

Notes: Lots of Bass, lots of treble, a little sizzly on the hi-end

OCD Version 2

serial# 4564 through #9473

Notes: Less Bass, more Mids than V1, slightly smoother highs

* @ serial#9127 to present have 1 Meg Audio taper Drive Pot for more Distortion

OCD Version 3

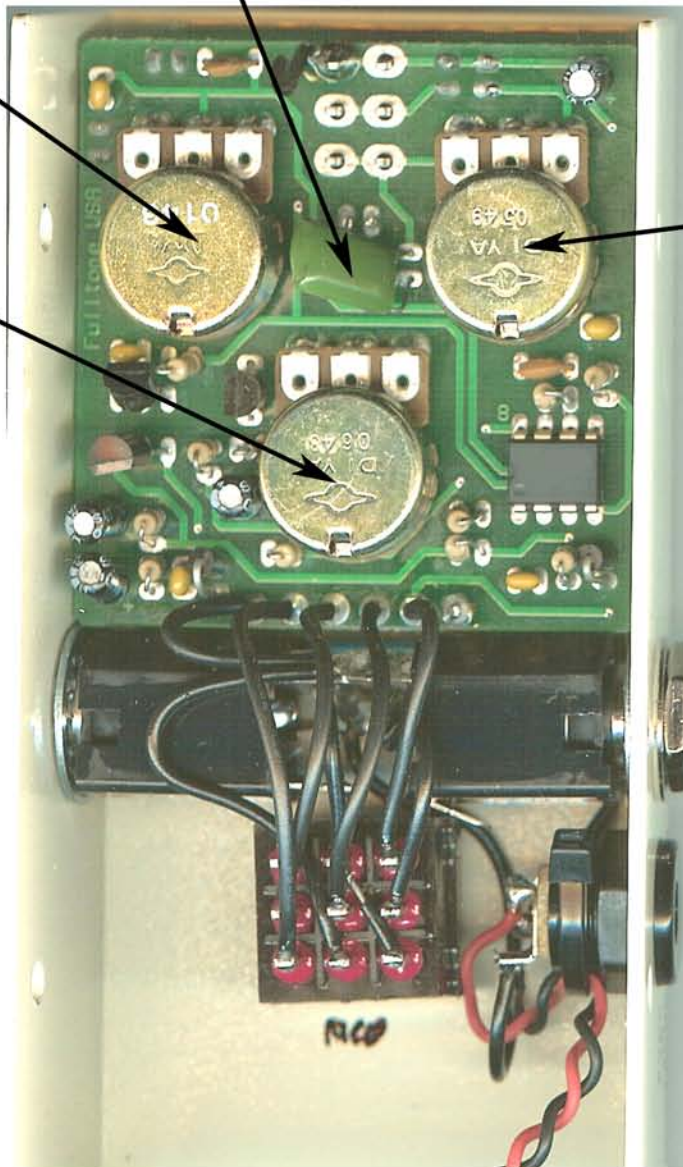

serial# 9474 and higher

change Tone Control Capacitor
to .047 Mylar, 25 volt or higher

change Drive Pot to
1 Meg audio Taper

change Tone pot to
10K B taper

same 500K B Taper
Volume Pot

Notes: Stronger Mids, more sustain, "better" Tone control.
